Professional Profile

Ben is a Data Analyst & Project Management support who supports our team with a wide range of consultancy assignments and internal reviews and reporting. Ben was instrumental in supporting our team gain the ISO9001-15 quality mark by preparing processes, procedures and internal reporting. Ben was also part of our bid team with the successful application of our government frameworks. Ben also helps to co-ordinate our commissioning role for Gibraltar Health Authority and Government of Jersey Health & Community Services for tertiary referrals made by the islands to the UK. Ben was also instrumental in developing demand and capacity models for COVID Virtual Wards throughout Lancashire and South Cumbria. Ben is an enthusiastic and highly motivated analyst who is highly analytical and is continually looking at ways to improve performance, outcomes and expenditure. Ben also supports our contracts team with contract negotiations, performance management of contracts and trends and supports individual patient queries. Additionally, Ben works on other assignments by analysing data outcomes and undertaking detailed research and demand modelling and costing.
